

# ATSR-Hub *EVO*

## Plugin Installation

### User Manual

Prepared by  
**Alexander Strallhofer**

## 1. Downloading the plugin

ATSR-Hub EVO is available to download on [GitHub](#). Make sure to download the latest plugin file (*ATSR\_Hub\_EVO.dll*) from the releases section.

Alternatively, the plugin file is also available on the [ATSR-Hub](#) Discord server.

## 2. Installing the plugin

### 2.1. Placing the plugin file into the SimHub directory

Place the ATSR-Hub EVO plugin file into your SimHub root directory (*C:\Program Files (x86)\SimHub* by default). Make sure SimHub is closed before proceeding.

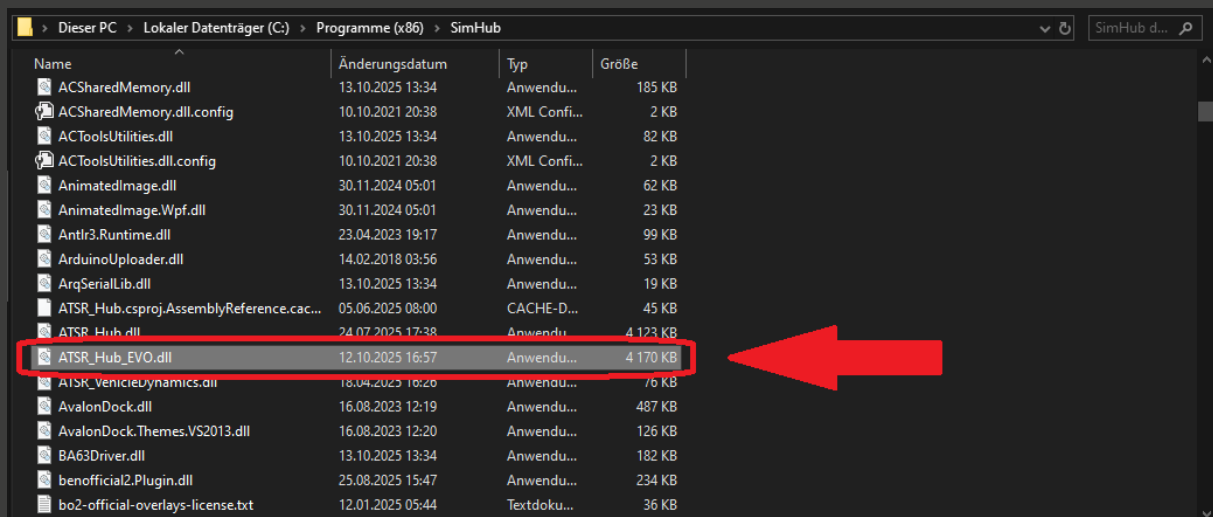

Image 1. Plugin file placement in SimHub root directory

Start SimHub after placing the plugin file into the correct location.

## 2.2. Activating ATSR-Hub EVO in SimHub

A prompt will show after starting SimHub which will notify that a new plugin has been detected. Activate the ATSR-Hub EVO plugin and tick the **Show in left main menu** option (This is recommended for quick and easy access).

Image 2: Prompt to activate ATSR-Hub EVO in SimHub

If this prompt does not appear, click the **Add/remove Features** button on SimHub's left main menu and activate the plugin through that page.

ATSR-Hub EVO is now installed and ready to be used. The plugin can now be accessed within SimHub through the left main menu.
